Just fyi – as an update on our activities, we have moved forward on a task order with Tetra Tech for support on this sampling effort. Earlier this week we participated in a very helpful call with the St Louis COE regarding FUSRAP sampling inside buildings and in soils in St Louis. A call is being set up among our experts to develop Data Quality Objectives for the sampling plan. We are still a few weeks away from having a final sampling plan but it is our highest priority right now.

FYI – we have not received any data yet from the Dailey’s attorney.

Thank you,

Lynn M. Juett

Hi Lynn

Just wanted to pass this along to you. My understanding is a great deal of her discussion will focus on the new info from the home dust samples you all are evaluating. We have been getting asked a lot of questions about any next steps, so encourage EPA to wheel out whatever plan or additional information you all need in proceeding forward with any actions as soon as possible. I'll be at 4-States meeting tomorrow and Friday, so will likely see you up there and we can discuss more. Just wanted to make you aware of the below information. Thanks.
